2. New Business

A. Discussion of Request for Park Equipment Surplus

The city was given some park equipment by the Inspire Development Centers; we had anticipated having it inspected for safety and installing it in one of the parks. This idea has been brought to a halt with the COVID Pandemic. In this time a local farmer has noticed it sitting by the WWTF and has asked if the city is willing to sell it to them. Mr. Gourneau stated simply that he would like it inspected before we sell it; they went around to everyone and this was the general consensus. The mayor is going to call the company, and have it inspected before they offer to surplus it to the farmer who was inquiring about it.
